Military Status: Exempted **Date of Birth:**12/2/2002

LinkedIn: https://www.linkedin.com/in/abrahem-mohamed-5b0aa8211

OBJECTIVE

Quality Engineer with over two years of experience in the cement manufacturing industry specializing in Quality Assurance (QA) and Quality Control (QC). Experienced in raw meal, clinker, cement, and quarry quality control, laboratory supervision, XRF analysis, and raw mix design. Passionate about process optimization, continuous improvement, and ensuring product quality through data-driven decision-making while maintaining the highest standards of safety and operational excellence.

EDUCATION

Alexandria University, Faculty of Science

Bachelor's degree of science at Chemistry / Physics

Grade: Very Good / **CGPA:** (3.00)

Graduation Project: Green Chemistry (Grade – Excellent – A-)

EXPERIENCE

Titan Cement Group APCC (Quality Engineer) / 2025 – Present
Key Responsibilities

- Supervise the daily operations of the Chemical, Physical, and X-Ray (XRF) laboratories, ensuring accurate and timely quality testing.
- Develop and optimize raw mix designs to achieve clinker quality targets while maintaining process stability.
- Monitor XRF performance, calibration, and analytical accuracy to ensure reliable chemical analysis.
- Perform Quality Assurance (QA) and Quality Control (QC) activities throughout the cement manufacturing process.
- Analyze laboratory and process data to identify trends and support continuous process improvement.
- Coordinate with Production, Process, and Maintenance departments to resolve quality-related issues.
- Ensure compliance with internal quality standards and applicable cement specifications.
- Promote laboratory safety and good laboratory practices.

Ameryah Cement (Quality Engineer / Quality Shift Leader) / 2024 – 2025

Key Responsibilities

- Led the Quality Control shift and supervised daily laboratory activities.
- Monitored raw meal quality to ensure compliance with kiln feed targets.
- Controlled lime production quality and supported stable kiln operation.
- Monitored quarry raw materials and maintained chemical consistency.
- Controlled cement mill quality and verified finished cement conformity with specifications.
- Performed routine chemical analysis and process monitoring using laboratory instruments.
- Worked closely with production teams to investigate quality deviations and implement corrective actions.
- Maintained laboratory records and ensured compliance with quality procedures.

Internships:

Egyptian Petrochemicals Company (EPC) | Aug 2024

- Gained exposure to PVC and VCM production, water treatment, laboratory operations, production planning, and quality assurance.

Alexandria Cement & Portland | Aug 2022

- Trained in cement manufacturing, quality control, operation management, and production processes.

Alexandria Water Company | Jul 2023

- Laboratory analysis, water treatment, quality assurance, and quality control.

Extracted Oils Company | Aug 2021

- Laboratory analysis, edible oils and soap production, and safety practices.

Courses:

- Lean Six Sigma Green Belt training
- ISO 9001:2015 – Quality Management Systems training
- Occupational Safety and Health Administration (OSHA) Training
- Fire Fighting & Emergency Response Training
- First Aid Training
- Petroleum Diploma – Process equipment, HAZOP, process control, and production operations.

Volunteer Work:

American Chemical Society (2022-2024)

Learned How to make a research paper and search for information, presentation skills, participate as a presenter for a scientific show on Chemistry Day, presentation on chemistry

Enactus Alexandria University (2023-2024)

I served as a team leader in a competition where I gained valuable skills in business administration, project management, presentation, time management, and creative thinking

SKILLS

- Leadership
- Team Management
- Analytical Thinking
- Problem Solving
- Decision Making
- Communication
- Continuous Improvement

LANGUAGE

English: level B2

Turkish: level A2
